

The CPPW 01-RF is designed to be used as an external source for accepting 9-48 volts Phantom power and drive a constant voltage of 9V dc to electret, condenser or boundary microphones.

Used in conjunction with Clockaudio open ended microphones this unit offers a discrete housing which can be placed either in a ceiling or under a table away from the actual microphone itself.

This product is fully shielded against radio frequency interference (RFI) from GSM devices operating in the 800 to 1200MHz bandwidth.
